2. It should be noted that the drawings have not yet been reviewed by a PTO draftsman. The drawings will be reviewed upon allowance of the application and Applicant will be apprised of their status accordingly.

Art Unit: 3677

Claim Rejections - 35 USC § 112

4. Claims 1-29 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As concerns the claims in general, the multiple uses of "or" and "/" render the claims indefinite because it is unclear which of the limitations are part of the claimed invention, and the resulting claim does not clearly set forth the metes and bounds of the patent protection desired; also, dependent claims which specifically refer to one of the alternatives are indefinite, since the claims do not require the specific alternative claimed. Also, the use of the abbreviations "ICC", "PDA", "SOAP", "XML" and "HTTP" should be spelled out. Also, claims which claim a "prior to" step, e.g., Claim 9, these claims are indefinite, since it is not clear where this step occurs, since there are multiple steps prior to the discussed step.

As concerns Claim 17 specifically, "the digital image service" lacks antecedent basis.

As concerns Claim 18, "the at least one *digital* image" lacks antecedent basis.

As concerns Claim 25, "The method" should be changed to --The system-- for antecedent basis purposes.

Claim Rejections - 35 USC § 101

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

6. Claims 1-29 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 1-29 show a series of steps which are grounded in the abstract idea of, for example, viewing, storing, downloading and ordering an image, etc. The broadly recited steps do not recite sufficient computer structure that are within "technological arts". Therefore, they do not satisfy the statutory requirements of 35 U.S.C. 101. See *In re Toma* 197 USPQ 852 (CCPA 1978).

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

8. Claims 1-29 are rejected under 35 U.S.C. 102(e) as being anticipated by Baum US 2002/0065741.

Baum teaches the claimed invention.

Patent Customers Advised to FAX Communications to the USPTO

9. In view of delays in mail delivery in recent days, we at the USPTO would like to encourage you to communicate with the USPTO via facsimile. **Facsimile transmissions may be used for correspondence as set forth in 37 CFR 1.6 such as: amendments, petitions for extension of time, authorization to charge a deposit account, an IDS, terminal disclaimers, a notice of appeal, an appeal brief, CPAs under 37 CFR 1.53(d), and RCEs.**

PTO Form 2038 should be used when authorizing payment by credit card; this form is maintained separate from the file to ensure confidentiality.

The USPTO has recently installed server software that enables us to automatically receive facsimile transmissions and route them to the appropriate groups. No special equipment is needed by our customers to use this system other than a regular facsimile machine. Each Technology Center has its own facsimile numbers associated with our server for Official replies to non-final Office actions and for Official replies to final Office actions. In addition, each Technology Center has a Customer Service Center on our server system and can answer any general application status questions you might have, can provide Examiner information and answer paper queries. The following is a list of all Official Facsimile numbers for Technology Center 3600:

TC 3600:

Before Final 703-872-9326

After Final 703-872-9327

Customer Service 703-872-9325

By using the Official Before Final and After Final numbers, our server system will automatically generate a return receipt that will include the number of pages received as well as the date and time the facsimile was received. Additionally, the return receipt will include an image of the received cover page. Applicants are advised to use the certificate of facsimile transmission

procedures when submitting a reply to a non-final or final Office action by facsimile (see 37 CFR 1.6 and 1.8). Applicants are also advised to retain the return receipt in the event that the Office has no record of the facsimile submission, whether the facsimile submission is a reply to an Office action (37 CFR 1.8(b)), or a continued prosecution application under 37 CFR 1.53(d) (37 CFR 1.6(f)).

Note, however, the Office currently does not permit new application filings (other than a CPA under 37 CFR 1.53(d)), requests for reexamination, drawings, and certain correspondence set forth in 37 CFR 1.6(d) by facsimile.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
